Directorio de centros de imágenes diagnósticas recomendados:

agenda tu mamografía hoy.

 **Sanitas**
Medical Center

Dedícale un momento a tu salud

La vida va rápido, pero tu salud nunca debería quedar en segundo plano. Dedicar tiempo al cuidado preventivo, como una mamografía, es un acto de autocuidado que puede salvarte la vida. Es un examen rápido, seguro y eficaz que permite detectar el cáncer de mama de forma temprana, antes de que aparezcan síntomas, brindándote más opciones y mejores resultados.

¿Cuándo debes hacerte una mamografía?

- **A los 40 años:** Hazte una mamografía de referencia.
- **Entre los 40 y 50 años:** Hazte una mamografía cada dos años.
- **A partir de los 50 años:** Hazte una mamografía anualmente.

Deberías hacerte este examen hasta los 75 años, o más tiempo si así lo recomienda tu proveedor principal.

También debes hacerte una mamografía a cualquier edad si tu médico la recomienda, según tus factores de riesgo.

Personas con alto riesgo

Las mujeres con alto riesgo de cáncer de mama pueden necesitar, adicional a la mamografía, una resonancia magnética de mama cada año, generalmente a partir de los 30 años. Esto incluye a quienes:

- **Tienen un riesgo a lo largo de la vida** de cáncer de mama del 20-25% o mayor (según antecedentes familiares).
- **Tienen una mutación en los genes** BRCA1 o BRCA2.
- **Tienen un familiar de primer grado** con una mutación BRCA (y no se han realizado pruebas genéticas).
- **Recibieron radioterapia** en el tórax antes de los 30 años.
- **Tienen síndrome de Li-Fraumeni**, Cowden o Bannayan-Riley-Ruvalcaba, o un familiar de primer grado con alguno de estos síndromes.

Si lo has venido postergando, hoy es un excelente día para dar el primer paso. Usa este directorio para encontrar centros de imágenes diagnósticas confiables cerca de ti. Prioriza tu salud, tu tranquilidad y tu futuro; porque la detección temprana salva vidas, y tú lo vales.
